

Senhao Printing Co., Ltd
Specialized in bespoke/custom rigid boxes, paper bags, labels ,etc.

Rigid Boxes/set-up boxes:

A "set up" box (or rigid paperboard box) is made of stiffer paperboard, permanently glued together with paper skins that can be printed or colored. Unlike folding cartons, these are assembled at the point of manufacture and transported already "set-up". Set-up boxes are more expensive than folding boxes and are typically used for protecting high value items such as cosmetics, watches or smaller consumer electronics.

(explanation from wikipedia)

Boxes are popular on account of its environmental protection aspect:

- ◆ A renewable resource, paperboard is biodegradable, so your product won't leave a permanent scar on the planet.
- ◆ We use glues made exclusively from synthetic materials, never animals.
- ◆ Senhao recycles its industrial waste, sending it back to the manufacturer to become new board and paper.
- ◆ Due to their durability and beauty, consumers often treat rigid boxes as keepsakes and use them for decorative storage, meaning your brand never enters the waste stream at all.
- ◆ To use FSC certified materials in your project, just contact us.

Senhao is focused on bespoke set-up boxes or custom rigid boxes. Every detail will be completely customized as per your requirements at quality level. Meanwhile, thanks to those experienced staff, we are able to make boxes at very good prices, too. And here are more details on box features for your reference.

Size:

Any size can be customized.

foldable boxes/ knockdown box:

A one or two-piece box made with rigid-weight chipboard covered in a wrap that folds flat for easy shipping. The assembled box looks and feels like a rigid box and is often held in place by tape or glue after erection.:

Quantity:

We can do any quantity; however, the smaller the quantity is, the higher the unit price will be with shipping cost included. Normally, the quantity of 1,000pcs can win a reasonable price.

Lead time:

Less than 1,000pcs: 10 days upon deposit receipt & artwork approval

Above 1,000pcs: 15 days or so

- a. Hot-Stamping, embossing, spot UV, etc. are manual, time-consuming, one-bag-at-a-time process which requires skilled operators, but the results are stunning! Therefore, the more finishes required, the longer time the delivery will take.
- b. Ribbon handles and the knotted ones take much more labor work, which will result in longer lead time.
- c. Production lead times are likely to increase during peak seasons.

Sampling charge:

2 options:

- a. Place order first, and proof sample delivered for approval before mass production.

- b. Clients pay sampling charge first, and it will be reimbursed when order is confirmed after sample approval.

Sampling time:

Digital printing proof sample: within 3 days, might be longer if any additional finishing required

Design Service:

If clients need us to work out the design, they need to advise vector file of their logo, and their general idea. Then we work out draft files and revise based upon their comments accordingly.

Freight:

Following costs are for your kind reference only, as the rate fluctuates a lot. Exact ones can only be advised before every shipment.

Courier Service: door to door service

To Italy

1kg: euro € 27 or so

10kgs: euro € 97 or so
